FIG 7

FIG 7 is a cross-sectional view of a segmented elongated member 23. The member 23 is composed of multiple segments 22. Each segment 22 has a central longitudinal hole 4. The segments 22 are joined together by a series of interlocking components 8, 12, 14, and 27. The member 23 is supported by a base 3. A dashed line 38 indicates a cross-section of the member.

FIG 8

FIG 8 is a cross-sectional view of a device assembly. The assembly includes a top layer (5, 11) supported by a series of triangular spacers (7) on a base (6). Below the base, a series of vertical structures (4) are embedded in a substrate (3). These structures are connected to a bottom layer (12, 28) via a series of horizontal lines (26). A central horizontal line (27) runs through the substrate. A dashed line (38) indicates a cross-section. A label (23) points to the top layer, and a label (24) points to the entire assembly.
